

Investment PHILOSOPHY

FCI's Core Equity investment process focuses on the large-capitalization segment of the market and seeks to identify high-quality companies with solid fundamentals, superior earnings growth potential and companies that are selling at reasonable prices. Through qualitative and quantitative screenings and valuation analysis, we strive to reduce downside risk and enhance long-term returns.

Investment OBJECTIVE

The strategy seeks long-term capital appreciation, investing primarily in equity securities of domestic companies. Our style is designed to meet a variety of investment objectives, including tax efficiency, as we seek to provide consistent growth of principal and to outperform the S&P 500 Stock Index net of fees with less downside risk, over rolling 3- to 5-year time periods.
